DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-18, and 20-26 are allowed.

Claims 1, 3-18, and 20-26 are allowable over the prior art of record, none of the prior art whether together singularly or in combination to teach the claimed combination as recited. The closest reference 6,850,077 does not disclose or suggest the improvement of the instant application comprises the steps of populating a data structure with data points that are relative to a predetermined target property including at least one of a target conductivity, a target material composition, a target surface treatment, and a target permeability and determining a complex impedance value of a transducer relative to a plurality of selected data structure data points so that a gap and a target material property can be determined based on an interpolation of the plurality of selected data structure data points relative to the complex impedance value.

Reference '077 teaches an eddy current proximity system for calculating the proximity probes impedance correlative to displacement and position of a target being monitored and correlating the proximity probe impedance with a characteristic of the conductive target.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
